## SUCCESS JOURNEY

Dr. Bhim Sain Kansal was born on August 3, 1955, in the small village of Gandhuan, Punjab, India. From an early age, he showed a strong interest in science and medicine. Growing up in a humble family, he remained dedicated to learning and improving healthcare through alternative medicine.

In 1972, he completed his matriculation and later pursued studies in electro-homeopathy, a treatment system focused on the body's natural healing process and energy balance. Through hard work and dedication, he earned his MDEH degree and specialized in electro-homeopathy.

**DR. BHIM SAIN KANSAL**

His research journey began in 1991, where he explored innovative applications of electro-homeopathy for human health. His continuous efforts and commitment led him to discover and develop several medicines for both humans and animals.

Recognizing the growing need for effective alternative healthcare products, Dr. Kansal founded UK German Pharmaceuticals in 2001, with headquarters in Cheema, Punjab (India). Under his leadership, the company earned a strong reputation for producing high-quality electro-homeopathy products and animal feed supplements.

Today, the company is recognized across India for its trusted products, quality standards, and commitment to natural healthcare solutions. Dr. Kansal and his organization have received multiple awards and appreciation for excellence in the field of alternative medicine.

Despite his achievements, Dr. Kansal continues to focus on research and innovation. He remains committed to developing advanced and effective formulations for improving the health and well-being of both humans and animals.

Dr. Bhim Sain Kansal's inspiring journey from a small village in Punjab to becoming a respected name in electro-homeopathy reflects his dedication, vision, and lifelong contribution to healthcare and medical innovation.
