Soap Noodles

ABOUT US

ORCHID CHEMIE is committed towards serving clients' needs by supplying high quality Chemicals. Our company was established in 2007 and since then has successfully fulfilled the requirements of various industries. Under the guidance of our esteemed Sir / Mam we have flourished as an eminent Supplier, Exporter and Importer of high grade chemicals. Due to our customer centric approach, we have been successful in serving a huge clientele spread all over the world and provide chemicals that are safe, appropriately packaged and cost-effective.

Quality Assurance :

Our principal aim is to provide quality products to the customers. By understanding the needs of the customers our skilled workforce is striving to provide better solution to the users and thus they preserve their ethics and lead in the competitive market. We procure these chemicals from reliable manufacturers and vendors who process the chemicals using high-end techniques that lends to the chemicals accurate composition and high viscosity. We duly test all the chemicals before their timely delivery to the customers.

Network :

ORCHID CHEMIE is reputed to be a prominent Supplier, Exporter and Importer of chemicals like Butyl Acetate, Ethyl Acetate, Dipropylene Glycol, Ethanol and N Butanol, etc. We procure all the chemicals from our trusted network of manufacturers and dealers. We have noteworthy relations with numerous dealers as we believe in ethical dealings and business practices.

Clientele :

Our aim has always been to provide superior quality products to the customers and it has enabled us to acquire a vast clientele that is loyal towards us. All the chemicals provided by us are highly appreciated in the market by the clients owing to their quality and assurance of competitive prices.

Butyl Acetate

Presenting the Butyl Acetate that has been procured from reliable manufacturers. Butyl Acetate is a boiling ester solvent. Butyl Acetate has a high evaporation rate and it provides quick drying lacquer. In a short span of 3 years, we are now recognized as one of the prominent suppliers of Butyl Acetate.

Features :

- Good composition
- Stable
- Good viscosity
- Good chemical properties
- Colourless
- Fruity odour
- Made using of non-toxic materials

Applications :

- Used for making coatings
- Used as a solvent for cosmetics and perfumes
- Used as coating for plastics
- Used in automobiles

Butyl Acetate Used As Solvent For Film-formers like :

- Cellulose acetate butyrate
- Nitrocellulose
- Ethyl cellulose
- Chlorinated rubber
- Polystyrene
- Methyl acrylate resins

Ethyl Acetate

Avail from us Ethyl Acetate, a quality chemical that has been processed using quality ingredients, the two major ones being ethanol and acetic acid. Our Ethyl Acetate is highly demanded in the market owing to its accurate chemical composition. It is majorly used as a solvent in various industries. We duly check the chemical before delivering them to the customers within a specified time frame.

Features :

- Colourless
- Sweet smell like pear drops
- Soluble in ethanol, acetone, diethyl ether, benzene
- Non-toxic ingredients
- Good viscosity
- Flammable and volatile

Used In Industries Like :

- Cosmetics
- Printing
- Paints
- Adhesive
- Pharmaceuticals
- Photographic films and plates
- Automobile

Storage Condition :

- Keep in Cool and Dry Place

Packaging Size :

- Bulk in Tankers
- 185 Kg MS Drum (Export)
- 200 Kg HMHDPE Drums

Dipropylene Glycol

We offer Dipropylene Glycol that is highly appreciated in the market owing to its good composition and viscosity. It has been processed for use in odour sensitive applications. Dipropylene Glycol is hygroscopic and is soluble in water and ethanol. Our Dipropylene Glycol has been processed from finest ingredients.

Attributes :

- Colourless
- Odourless
- Water soluble
- High boiling point
- Low toxicity

Used In :

- Skin care products like lotions, creams
- Cosmetics
- Shaving products
- Hair care products like shampoo, conditioner
- Perfumes and colognes
- Deodorants

Ethanol

We offer to the customer finest quality Ethanol. It is used in alcohols and beverages. Ethanol is used in using the finest quality ingredients. We provide Ethanol in safe packaging and duly test it before delivering it to the customers. We are recognized as one of the prominent Suppliers, Exporters and Importers of Ethanol.

Features :

- Colourless
- Strong characteristic odour
- Flammable
- Burns with smokeless blue flame
- Volatile

Applications :

- Used as solvent in food colourings and flavourings
- Used in scents, aftershaves and nail varnish and nail polish remover
- Fuel for heating, cooking and lighting
- Used as base ingredients for production of beverages
- Used in processing of antibiotics, vaccines, tablets, pills, vitamins

N Butanol

We make available to the customers N Butanol, a colourless chemical that is used extensively as a chemical intermediate and solvent. N Butanol has been processed using high grade ingredients and advanced techniques. N Butanol serves many purposes in various industrial sectors. We duly check our N Butanol before delivering it to the customers in safe packaging.

Attributes :

- Colourless liquid
- Good composition
- Good chemical properties
- Good viscosity
- Soluble in water
- Low toxicity

Used As :

- Solvent for paints, coatings, resins, gum, dyes, alkaloids
- Swelling agent in textiles
- Component of brake fluids
- Degreasers
- Component of ore floatation agent
- Component of wood-treating system

N Propanol

Avail from us N Propanol, a colourless chemical that is used as a chemical intermediate and solvent. It is also useful in organic synthesis. Our N Propanol is procured from trusted manufacturers and dealers. It is highly appreciated in the market owing to its good chemical properties and composition. We make N Propanol available to the customers in safe packaging.

Eastman n-Propanol (n-propyl alcohol), a three-carbon straight chain alcohol, is a medium boiling colorless liquid that is useful in organic synthesis and as a chemical intermediate and solvent. It has a typical alcohol odor, similar to that of ethanol and is soluble in water, alcohol, and ether.

Attributes :

- Colourless
- Good viscosity
- Highly soluble in water
- Flammable
- Good viscosity

Used In Industries Like :

- Paint
- Printing
- Automobile
- Plastic
- Metal
- Pharmaceutical

Application/Uses :

- Appliance coatings
- Automotive OEM
- Chemical intermediate
- Cleaner for ink processes
- Coatings
- Coatings for automotive
- Coatings for Automotive Plastics
- Coatings for plastic
- Ester Solvents
- General Metal
- Industrial printing inks
- Printing Inks
- Solvents
- Truck/Bus / Commercial Vehicles

Stearic Acid

We present to the customers Stearic Acid of the finest quality. Stearic Acid is a saturated fatty acid. Our Stearic Acid has been procured from reliable vendors and manufacturers. It has been processed from high grade ingredients. It is used in various industrial segments and serves a variety of purposes.

Attributes :

- Waxy solid
- High melting point
- Good chemical properties
- Odourless

Uses :

- Used for making candles, plastics, dietary supplements
- Used in cosmetic products
- Used for softening rubber
- Used as hardener in candies
- Used as lubricants during pressing of ceramic powders

Sodium Lauryl Ether Sulphate

We offer Sodium Lauryl Ether Sulphate that is procured from reliable dealers. Sodium Lauryl Ether Sulphate has been processed using high quality ingredients that lend it an accurate composition. It is an effective foaming, cleaning, emulsifying and wetting agent. Our Sodium Lauryl Ether Sulphate is duly checked before being delivered to the customers. You can avail at the most competitive market rate.

Features :

- Good solvency
- Resistant to hard water
- Highly bio-degradable
- Non-toxic
- Low irritation to skin and eyes

Packaging :

- 160kg / 170kg (n.w.) per plastic drum.

Storage :

- Store this product in dry and cool place kept away from sunshine and rain.

Applications :

Mainly used as the raw material of cosmetic, personal care and household products such as shampoo, bubble bath, detergent, showing foam stability and low irritation of skin. These series products are suitable for viscosity adjustment. These two materials can be also used as the emulsifier for emulsion polymerization

Refined Glycerine

We are one of the prominent Refined Glycerine Suppliers and Exporters. We provide to the customers Refined Glycerine that has been processed from finest quality ingredients. We procure this Refined Glycerine from reliable manufacturers and dealers. We offer Refined Glycerine in suitable packaging that is safe and handy. In addition to this, we check our Refined Glycerine before delivering it to the customers.

Features :

- Colourless
- Odourless
- Viscous liquid
- Hygroscopic in nature
- Soluble in water

Used As An Agent In :

- Cosmetics
- Toothpaste
- Shampoos
- Soaps
- Herbal remedies
- Pharmaceuticals
- Candles

Soap Noodles

We are a pre-eminent Supplier of Soap Noodles. Soap Noodles are used for the manufacturing of high quality soaps. It lends a consistent composition to the manufactured soaps. These Soap Noodles have been processed from high quality ingredients. We provide Soap Noodles to the customers in appropriate and safe packaging. We check the Soap Noodles before delivering them to the customers within a time bound frame.

Manufactured Using :

- Vegetable oils
- Palm oil
- Olive oil
- Coconut oil
- Animal fats

Applications :

- Used in agriculture as fungicide and herbicide
- Used in medicine for whiff test and in cuticle solvent
- Used as formulation aid for food
- Used in textile processing
- Used as an anti foaming agent
- Used as a cleanser

Packaging :

- 25Kg Net Kraft Paper Bags with inner PE liner 1 x 20' FCL - 20MT
