Worldwide

About Our Company

Price : Rs. 180/ kg.

Hydrolyzed Vegetable Protein Flavor Enhancer

We are the leading manufacturer of Hydrolyzed Vegetable Protein Flavor Enhancer is a natural alternative to sodium glutamate/ajinomoto used in chinese food, HVP acts as a flavor enhancer for seasoning on ready to eat food products.

As the proteins are broken down into their constituent amino acids, the result contains as much as 20 percent glutamate and that is the reason hydrolysed vegetable protein is accounted as a constituent in foods giving it a savory or a meaty flavor.

Organic Nitrogen Fertilizer

Our range of Organic Nitrogen Fertilizer based on Hydrolyzed Proteins Input is widely used as organic fertilizer supplying nitrogen in all kinds of agricultural crops.

Hydrolyzed Proteins Based Organic Nitrogen Fertilizer Input is available in **LIQUID and POWDER** form with different percentage of proteins.

Rs.10/ Kilogram.

Seed Coating Polymer

The high-quality Seed Coating Polymer, delivered by us, is non-toxic and is manufactured using super absorbent polymer. With the aid of modern storage facility and diligent professionals, we are capable to fulfill quick and voluminous requirements of the clients.

Also, we ensure complete safety of the stored products. With our years of experience, our company name figures amidst the most responsive and responsible Suppliers of Seed Coating Polymer.

About Our Company

Kosher Soy Peptone

We supply, 100% pure Kosher Soy Peptone, which is processed from top-quality soy and has a long shelf life (2 years). From bulk to retail order fulfillment, we can do it all. Our company has a wide supply chain network to provide our buyers with the product all year round and make timely delivery.

Crabshell Biostimulant Fertilizer

The effects of Crab shell on plants in improving health & improve plants resistance towards various diseases fungus, nematodes is well known even though Crab shell is not a fungicide or nematocide.

Amino Mine Acid Organic Fertilizer

The Amino Mine Acid Organic Fertilizer, manufactured by us, is 100% pure with 50-80% total amino acid and low moisture content (1-2%). With our fast delivery network, we can easily meet expected delivery deadline of the clients.

So, what are you waiting for, place orders now!

About Our Company

Natural Potassium Humate Fulvic Shiny Flakes

Price : Rs. 75/ kg.

Why Are Humates So Important? : Everyone Knows What Happens When Soil Becomes Depleted :

Yields drop. Crops become more susceptible to disease and weaker stock is an open invitation for pests to move in. Crucial to life, humates restore the natural balance in soil necessary for optimal plant growth, and provide the foundation for plant vigor.

Protein Hydrolysate Fertilizer

Proteins are the basic building blocks of living cells. Proteins are formed by the sequence of amino acids.

The amino acids are organic substances consisting of an asymmetric carbon to which are bounded an **amino group (-NH₂)**, a **carboxylic group (-COOH)** & two characteristics radicals of each amino acid (R & R").

Rs.10/ Kilogram.

Seaweed Extract Powder Organic Fertilizer

SUBONEYO is the LARGEST Indian manufacturer of Soluble Seaweed Extract based Organic Fertilizer Powder which is produced by careful extraction & hydrolysis of seaweeds of various seaweed varieties such as Imported Ascophyllum Nodosum, domestic sargassam and further concentration & drying at low temperature to yield highly nutritious Soluble Seaweed Extract based Organic Fertilizer input having Excellent Bio Nutritional Properties which provide nutrition to plants in critical growth stages.

**Sea Grow WS is a excellent source for producing Liquid
& Powder Bio Organic Fertilizers.**

About Our Company

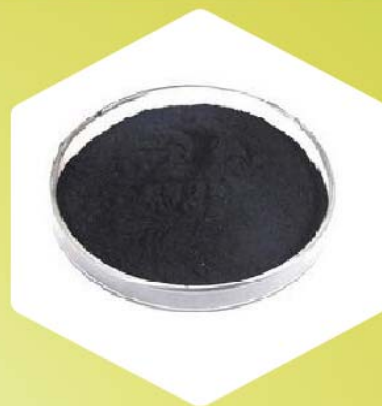

Kosher Pea Peptone

Suboneyo is the leading Largest Manufacturer in India for Peptones (**Protein Hydrolysates**) range of products deriving from Soybean, Milk Protein Casein, Corn etc

Liquid Bio Extract Organic Fertilizer

Seaweed Extract based Liquid Bio Extract Organic Fertilizer Input is manufactured from the careful extraction of natural vegetable seaweed in presence of lactobacilli animal origin products, vegetable decay products, enzymes to yield liquid Vital Bio extract organic fertilizer input having excellent bio-nutritional properties which provide organic carbon, carbohydrates, polysaccharides ,organic matter for better nutrition of plants in various stages of plants.

Plant Agricultural Nutritions

After years of research, we at Suboneyo have developed **Protein Hydrolysis methods & patented mineral chelation techniques** using hydrolyzed proteins.

Animal/Poultry Nutritions

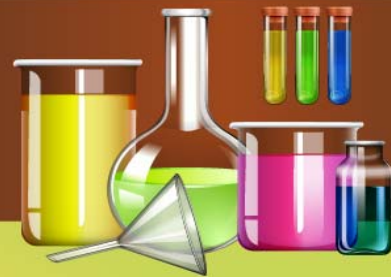

A] Digested/Hydrolysed Protein Conc:- Pro Feed Liquid/Powder for Poultry, Pigs, Livestock.

B] Amino Acid Chelated Minerals, Proteinates

About Our Company

Foamcrete Construction Chemicals

SUBONEYO has developed for the FIRST TIME IN INDIA a Natural Origin foaming agent (FOAMCRETE) which is concentrated with enzymatic active components, and is developed for the building material industry.

FOAMCRETE when diluted in water and processed in foam generator with compressed air it produces very fine and stable high quality foam depending on dilution and settings of the foam generator.

Hydrolyzed Silk Protein

Silk Amino acids/Hydrolyzed Silk Protein

Our Silk amino acids are carefully manufactured by hydrolysis of pure natural silk without harming the silk worm or moth.

Silk amino acids give the skin a very soft and velvety feel when used in a cosmetic product and have some excellent water binding properties. Silk amino acids (silk proteins) also have a certain amount of antioxidant action.

Vegetable Origin Peptone

We are engaged in manufacturing and supplying of Vegetable Origin Peptones which are widely used in culture media for cultivation and other purposes. These are excellent source of vitamins and are available in the following types :

Soy Peptone

Yeast Extract Powder

Acid Hydrolyzate of Soy Tech/Pure
