ECON

has been incorporated as a healthcare organization which is driven by a mission of excellence in the provision of healthcare services to global communities. We are committed to creating and maintaining a culture that continually reinforces our high ethical standards. Over the years, our company has created for itself a niche market in the pharmaceutical domain by a strong focus on the manufacturing and marketing of a range of tablets, surgical instruments and disposables.

Our Mission.

Product Mission: To produce, distribute the best quality products in the healthcare sector at an affordable price to every segment of the humanity.

Social Mission: None should be deprived of proper and quality medical care. The company is conceived on this need, a need which is yet to be fully addressed in many of the developing, under developed countries. Cost should not be a factor to deny the right to have proper medication.

Our Vision.

Our vision is to provide healthcare products with a customer centric focus of quality and eliminating disparities in all sections of society with respect to the issue of affordability.

Our core competency is our ever growing quality improvement programs and zero defect methods of manufacturing which in turn lower product costs and this benefit is directly passed on to the customer..

Our Value Proposition.

**The Quality promise. An ISO
and CE certified company**

**Customer expectation.
Priced to meet The**

Guaranteed deliverables.

Experienced Workforce

**Strong Recourse network-through channel
partners for supply and distribution.**

**Many products (Surgical and drugs)
under the same roof**

infusion Therapy

I.V.infusion Set

- Strong and shep spike for easy section in LV Contause
- Round collapsible drip chamber to facilitate mad level adjustment and drop count
- Dis type fluid filter for filtration of fluids for any particulate matters.
- Kink resistant tubing with efficient aller contriller for accurate and restricted tow
- Thick ell sealing lates buth for esta medication and fishing
Single use, shesile and non-pyrogenic.

Infusion set

- 20 drops/ml. Approx.
- Available with or without win needle

Infusion set with Air vent

- infusion set with built-in air vent bacteria barrier hydrophobic.
- Available with or without vein needle

Technical specifications						
Ref.	Product Specification	Nrrdle Size	Drop/ml. (Distilled water)	Length in cm	Packing	Packing inner/ outer unit
IVS1306SL	13+C,6+ g tubing/plain Latex	21G X 1.5"	20	150	Pouch / paper	25/550
IVS1306SEV	13+C With,7 g tubing/plain Latex , ext.valve	21G X 1.5"	20	150	Pouch / paper	25/550

Blood Transfusion set With Air Vent/Without Air Vent

- Disposable Blood transfusion Set for transfusion of blood from collapsible Blood bags
- Manufactured as per ISO standard
- Cylindrical drip chamber provided with filter to prevent passage of any clot.
- Latex flush valve bell for extra medication.
- Efficient roller controller to accurate adjustment of infusion rate
- individually packed.
- Single use, sterile and Pyrogenic free.

VIVAN MEDITECH

CARE WITH QUALITY

Dealing in medical equipment and surgical product.

Respiratory Care

Oxygen Masks - adults and paediatric

- We manufacture Oxygen Mask from soft non toxic and medical grade PVC compound the Oxygen Mask is used for convenient oxygen administration We offer Oxygen Mask in different Specifications and that too at reasonable prices.

Features:

- Elastic strap and Aluminum nose clip is provided on the Mask for proper adjustment of Mask on nasal area
- Multi-channel tube ensures regular supply of Oxygen if tube is accidentally kinked
- Tube is provided with connectors at both ends for easy connection with oxygen source

Size	
Type	Tube Length
Adult	210cm(7ft)
Child	210cm(7ft)

Nebulizer Masks

- Made from special transparent non toxic material.
- Nebuliser chamber capacity 7cc.
- Facemask with aluminum dip designed to fit comfortably over the patient's mouth.
- the it contains jet Nebuliser, oxygen mask with nose clip, elastic band and 180 cm long tubing
- The connecting tube has internal serrations (STAR LUMER)
- ETO Sterile and Pyrogen free

Variants : Packing- Polyethylene pack, Paper pack Ribbon pack, box pack available

Ventilator Circuit

- ventilator Circuit is the gas pathway connecting patients lung to the mechanical ventilator, it is essential that Circuit should be highest quality in order to Ventilate patient correctly, efficiently and safely Econ offers wide range of circuit with 50 standard connectors to suit most of the ventilator and humidifier, combinations. We can customize the product as per the individual need

Product features : Wide range, high transparency, Flexibility, minimum compliances and sterile

HME & BVF Breathing Filter

Medical filters : are used in respiratory support equipment such as life support and human ventilation machine, fitted in the airway between equipment and patient. The removal of bacteria from the air breathed in the hospital environment is critical in The protection of the patients, other hospital personnel and breathing support equipment

Econ's HME & BVM filters : utilize hydrophobic membrane & synthetic media that provide barrier & electrostatic filtration with bacterial & viral removal efficiency higher than 99.99% accomplished with extremely low resistance to airflow. The HME Keeps moisture retention and warming of inhaled a, Aero clean filter design in different sizes with CO₂ monitoring port, facilitate use on a wider range of patients

Product features : Manufactured from non toxic plastic. Combined Filter/HME reduces set-up time, minimizes dead space and weight on Endotracheal tube and circuit while maximizing efficiency Electrostatic Hydrophobic membrane protects against cross-contamination. Hygroscopic membrane traps patient's moisture providing effective airway humidification. Low resistance to airflow minimizes work of breathing Effective moisture control reduces the risk of colonization in breathing tubes and minimizes sampling line blockage. End tidal CO₂ sampling port offers convenient access to airway gases 150 standard 15mm and 22mm fitting connects with breathing system Treated with physiologically safe calcium chloride. Patient/Machine end

Swivel Mount Catheter

- Swivel Mount Catheter connects patient Et to breathing circuit. This minimizes the jerk of breathing to ET or TT reducing trauma to trachea. The double swivel makes no dragging on breathing circuit & ET or TT.
- Product features Light weight, Double swivel rotates 360° on both axis. Minimum compliance, Low dead.

Multi-flow Venturi Mask

- Multi-flow venturi Mask is good for Patients who require controlled oxygen therapy especially in the case of patients with asthma and COPD. There are 7 different connectors with different colour coding from 24 to 60%. Each connector has got distinct marking of required flow of Oxygen in litres per minute along with percentage achieved through it

Umbilical Cord Clamp

- Umbilical cord Clamp is used for clamping the umbilical cord of newly born baby engaged in offering superior quality Cord Clamps to the clients Manufactured from medical grade polymer, our Cord Clamps are widely demanded by the hospitals, nung homes, etc.

Features:

- ▶ Permanent locking system protect against the reopening of the clamp
- ▶ Finger grip is provided to facilitate easy holding and locking of the clamp
- ▶ Catheter clamp is also available for clamping the catheters.

Mucus Extractor

Mucus Extractor that offer excellent features like...

- **Specially designed for aspiration of secretion from Oropharynx in newly born babies to ensure free aspiration**
- **Clear transparent container permits immediate visual examination of the aspirate**
- **Also suitable for obtaining mucus specimen for micro biological examination**
- **Spare closure cap is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container**
- **Low friction surface catheter is provided with open end silk smooth round tip for trauma free insertion**
- **Capacity 20 to 25ml.,**
- **Individually packed**
- **Inner box of 25pcs**
- **Disposable, Sterile Ready for use**

UROLOGY

Urine Collection Bag

We are instrumental in offering superior quality Urine Collection Bag. These Urine Collection Bags are manufactured from medical grade soft PVC sheet having approx of 0.10 mm thickness. The Urine Collecting Bag is used for short and long term urine drainage. Further, these Urine Collection Bags can be availed in various capacity sizes.

Features:

- Non Return Valve to avoid the back flow of urine
- Super smooth, 85cm kink resistance tube provided with chamber, non-toxic, kink free, extra soft transparent PVC long tubing
- Universal Connector for easy connection to the drainage catheter
- Bag is graduated with easy to read scale
- Also available with Top Bottom Outlet and Molded handle for easy handling and carrying facility
- ETO. Sterile/non ETO Individually packed

Packing:

- Polyethylene Pack, Paper Pack, Ribbon Pack, Box Pack available
- Urine Bag Economic

Technical specifications				
Ref.	Description	Tube Size	Capacity	Packing inner/outer unit
UB1015R	Urine bag	15g	2000 ml	
UB1020R	Urine bag	20g	2000 ml	
UB1025R	Urine bag with hanger	25g	2000 ml	
UB1040HS	Urine bag with Cap	20g	2000 ml	100/1000

Profile

At Vivan Meditech, we are trying our best to convert all challenges into opportunity in order to meet all latest needs of the disposable surgical products. We are fully involved and engineering new surgical products particularly in intravenous transfusion devices. Our aim and objective is to develop multichannel and multibarrel intravenous cannula and devices to facilitate professionals for administering fast, accurate and multiple injection fluid during critical stage of the patients. Our all Products had captured maximum share of Indian market and we also penetrating fast into international market. We are treating and applying high medical grade polymers and best grade of S.S. Cannula. Our research and development experts are aiming fast for new design and development of new devices. Process and manufacturing are the core area of our high concern and run by technocrats. Clean room and its consistency are on high focus area maintained and inspected by laboratories experts. Sterilization a key norm related to product life is processed and managed well. The quality assurance of the product is being supervised by well experience pharmacy professional.

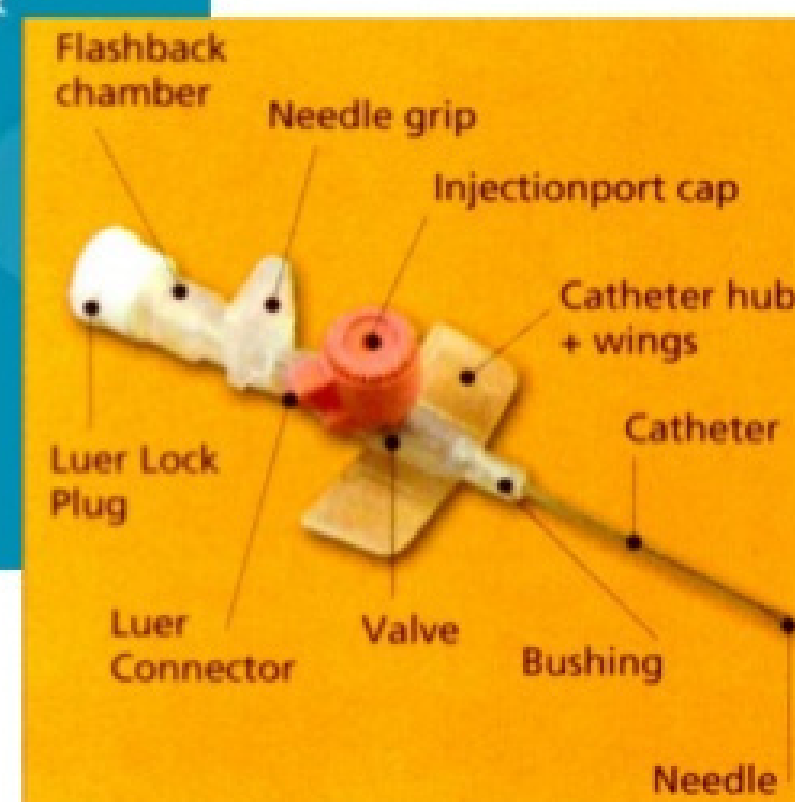

Product Range

- Intravenous Cannula
- Infusion Set
- Blood Transfusion Set
- Measured Volume Set
- Micro drip Infusion Set Urine Collection Bag
- Surgical Latex Gloves
- Umbilical Cord Clamp
- Mask, Cap & Apron

Quality Commitment

As we understand the quality standards therefore we accept and committed to quality of product with emphases which may cost and hard to follow. Our quality standard starts from concerned man, material, manufacturing and ends with quality management hence our products are results of self declaration of quality.

AMIGO I.V. CANNULA

Intravenous Cannula with Injection Valve

We offer our range of I.V. Cannula with injection valves and PTFE catheter. We provide international colour codes which facilitates the easy identification of size. The sets are manufactured from high-grade non-toxic material, making it safe for humans and the environment.

Some of the other salient features are:

- **S.S Cannula** having double back cut ground stainless steel needle for smooth and painless vein puncture. We import it from Japan. We siliconised the same.

- **PTFE Catheter:** Internationally accepted excellent quality Teflon (Poly Tetra Fluoro Ethylene) is completely imported. The tip of the catheter is tapered on automatic machine for easy insertion into the vein.
- **NON-RETURN Valve:** Side injection valve for easy access of intermittent administration of fluid with non-return valve which prevents the back flow.
- **PEEL-OFF Paper:** A medical grade grid paper is used for blister packing which provides the effect of easy & smooth peeling.
- Sterile by ETO gas.
- Non Toxic, Non Pyrogenic.
- Sizes: 14G, 16G, 18G, 20G, 22G, 24G

I.V. Cannula Technical Specifications				
Gauge	Colour Code	Ext. Dia (mm)	Length (mm)	Flow rate ml / min
14	Brown	2.0	45	260
16	Gray	1.7	45	170
18	Green	1.3	45	80
20	Pink	1.1	32	54
22	Blue	0.9	25	33
24	Lemon yellow	0.7	19	20

Infusion Set

The material used to manufacture this Infusion Set is of medical grade non-toxic plastic granules.

Certain other features are:

- **Precision moulded drip chamber with sharp spike for smooth penetration.**
- **Clear transparent chamber to see fluid flow.**
- **Smooth, flexible, kink resistant tubing which is made up of non toxic medical grade P.V.C. granules.**
- **Provided roller clamp for controlled flow of fluid.**
- **Self sealing Latex tube for additional medication.**
- **Sharp, smooth vein needle (21 G) for non traumatic cannulation.**
- **Sterile by ETO gas.**
- **The set is for single use, Non Toxic, Non Pyrogenic. and sterile.**

Blood Transfusion Set

The clear, transparent and soft tubing is manufactured from medical grade PVC. The material used to manufacture these blood administration sets is completely non-toxic and causes no harm to humans or the environment.

Certain other features are:

- **Cylindrical drip chamber fitted with nylon filter to eliminate the risk of clotting in the vein.**
- **Clear transparent chamber to see fluid flow.**
- **Smooth, flexible, kink resistant tubing which is made up of non toxic medical grade P.V.C. granules.**
- **Provided roller clamp for controlled flow of fluid.**
- **Self sealing Latex tube for additional medication.**
- **Sharp, smooth vein needle (18 G) for non traumatic cannulation.**
- **Sterile by ETO gas. The set is Non Toxic, Non Pyrogenic.**

Urine Drainage Bag

Our sterile ready for use urine bags are designed for short and long term urine collection.

- Made of medical grade soft and transparent PVC sheet.
- Extra pressure resistant leak proof bags.
- Provided with thick, soft, kink free PVC tube.
- Easy to read accurate scales.
- Efficient non-return valve.
- Capacity: 2000 ml
- Individually packed in pouch.
- Sterile by ETO gas.

Surgical Latex Gloves

Our surgical gloves are made from natural rubber

Other features:

- A-grade quality.
- Rough texture.
- Pre-powdered.
- Sizes: 6,6%, 7,7%.8
- Sterile by ETO gas.

Umbilical Cord Clamp

The umbilical cord clamps are designed to clamp the umbilical cord immediately after birth. The clicking system ensures that the lock is closed properly, and this lock also ensures against the accidental reopening of the clamp.

Other features:

- Sterile by ETO gas.
- Non Toxic, Non Pyrogenic.

Mask, Cap, Face Shield, Gloves & Apron
