### Introduction

At Allcut, our mission is to empower professionals with high-performance cutting solutions that enhance productivity, precision, and safety. We are dedicated to designing and manufacturing innovative tools that exceed industry standards, providing our customers with the reliability and efficiency they need to succeed in their work. Through continuous research, development, and collaboration with our customers, we strive to deliver cutting-edge solutions that streamline operations, improve outcomes, and contribute to the growth and success of businesses across diverse industries. We are committed to maintaining the highest quality standards, prioritizing customer satisfaction, and driving innovation in the field of magnetic drilling machine, wire stripping, beveling machines and cutting tools.

### Who We Are?

ALLCUT has a rich history rooted in the passion for innovation and a commitment to delivering high-quality machines. Founded in 1950, our company embarked on a journey to revolutionize the industry with advanced solutions that meet the evolving needs of professionals across various sectors. From our humble beginnings as a small workshop, Allcut has grown into a reputable and trusted name in the field of drilling industry. Our founders, driven by a vision to provide cutting-edge tools that enhance productivity and precision, laid the foundation for what would become a pioneering company in the industry. We started our journey with manufacturing of radial and pillar drilling machines. By looking at the rapid change in the drilling industry, our founder "Mr. Jaysukh Rathod" established the magnetic drilling technology in India. In early 1991, we started the manufacturing of magnetic drilling machines in our Bhavnagar plant, with our robust three models. Later on, our co-founders, "Mr. Paras Rathod, Mr. Dharmendra Rathod, Mr. Rakesh Rathod and Mr. Mitul Rathod", developed a whole new range of magnetic drilling machine along with pipe beveling machines, plate beveling machines, plate cutters, hack saw machines and special purposed machines as per the industrial need. Recently with the growing industry of scrap recycling, We started a whole new line-up of scrap machinery, which includes wire stripping machines, wire granulators and shredder machines. Which gave us an unexpected growth along with the customer satisfaction. Over the years, Allcut has continuously invested in research and development to stay ahead of the curve. We have assembled a team of skilled engineers and experts who bring their expertise and passion to every aspect of our product development process. This dedication to innovation has allowed us to introduce cutting-edge technologies, materials, and designs into our product line, ensuring that our machines and tools remain at the forefront of performance and efficiency.

### Our Mission

Allcut Mag Drills are at the forefront of cutting-edge drilling technology, providing professionals with a reliable and efficient solution for their drilling needs. These innovative magnetic drills are designed to enhance productivity and precision in various industries. Featuring a powerful magnetic base, Allcut Mag Drills offer unparalleled stability and secure attachment to metal surfaces, eliminating the need for additional clamping or fixturing. This advanced magnetic technology ensures accurate and controlled drilling operations, even in challenging environments. Built with durability and performance in mind, Allcut Mag Drills are crafted using high-quality materials and equipped with robust motors. This enables them to effortlessly drill through tough materials such as steel, stainless steel, and other metals. Whether it's for fabrication, construction, or maintenance, these drills deliver consistent and reliable performance, making them indispensable tools in the arsenal of professionals. Versatility is another key feature of Allcut Mag Drills. They are compatible with a range of cutting accessories and attachments, providing flexibility to meet specific drilling requirements. Whether it's hole saws, annular cutters, or other accessories, Allcut Mag Drills offer comprehensive solutions for various hole-cutting applications. With Allcut Mag Drills, professionals can experience the perfect balance of power, precision, and ease of use. These drills are designed to optimize drilling performance, enhance workflow efficiency, and deliver exceptional results. Whether you're working in metalworking, construction, or any industry that requires accurate drilling, Allcut Mag Drills are the go-to choice for professionals seeking reliability, durability, and cutting-edge technology. At Allcut, customer satisfaction is at the core of everything we do. We are committed to providing an exceptional experience for our customers, from the moment they engage with us to long after their purchase. Our dedicated team goes above and beyond to understand the unique needs of our customers and provide tailored solutions that meet their requirements. We prioritize clear communication, prompt response times, and professional support to ensure a seamless and enjoyable experience. Our commitment to quality craftsmanship, innovative technology, and reliable performance ensures that our customers receive cutting tools they can trust. We value the feedback and input of our customers, and continuously strive to exceed their expectations and deliver the highest level of customer satisfaction in the industry.
