

# SINGLE PHASE HYBRID MPPT PCU (1-50 KVA)\*

### Genuine 'Hybrid' - Not just 'Off-Grid'

Our HBD series offers hybrid solar inverters of 1-250KVA to residential/commercial/industrial customers. This series is built to resolve the two challenges posed by unreliable grids and power cuts – intermittent electricity and high electricity costs. Energiaa's HBD series inverters are essentially grid-tie inverters with storage. They also work as standalone systems in case of no grid. They not only store electricity in the attached batteries but also export unconsumed solar power to the grid, or store and mix with the grid as programmed in its 'behind-the-meter' use.

<sup>\*</sup>Other customised ratings available on request

# HBD SERIES

### **KEY FEATURES**

Bi-directional	Seamless switching to and from grid (both import and export) and battery supply, high-efficiency MPPT technology
Grid-interactive	Blends solar and grid-power for optimisation
Energiaa's Benchmark Solar Te	We use the latest DSP-based 'Active Front End' technology with IoT to achieve 'flexible' or 'smart' energy
IEC certified	IEC certifications available
Behind-the-Meter	Latest global tech enabled where in the absence of Net-Meter policy, we can store solar energy into battery and then blend it with Grid during high-tariff times or with DG-set for DG-set optimisation
Easy-to-monitor	Optional GPRS-based remote monitoring and controlling
3-Priority working modes	HBD with export/ HBD without export/ Off-Grid
Pure sine wave technology	Recommended for longer life of Industrial/ Commercial equipment
Intelligent battery charging	3-Stage charging (Float, Bulk & Absorption) for more battery life (for Lead Acid batteries).  Communication-based charging for Lithium chemistries available
Compatible charger	Supports wide range of batteries – Flooded Lead Acid Tubular/GEL/VRLA. On request product for Li+chemistries available

### **KEY BENEFITS**

Customisable Energy Shift	Store power and use later
Runs AC at home	Can sustain jerk loads like Air Conditioner
Protection	Protects against grid fluctuations, overload, short circuit, array reverse, battery reverse and thermal fluctuations
Galvanic Isolation	Uses galvanic isolation at output – Ideal for Rural/Microgrid applications
Long life	Lifespan of 15+ years
Almost zero-servicing	Our robust HBD series inverters are IoT-based and require zero to negligible servicing and maintenance
Largest-in-class display	Beautiful display units showing all inverter+solar+battery data

**TOLL-FREE SERVICING SUPPORT: 1800-891-3319**
