WHAT WE ARE

Shyam manufacturing quartz stone with its plant located at MORBI, Gujarat, India. Shyam Quartz Stone has the capacity to manufacture 13,000 SQMeter of quartz stone Per Month.

Quartz stone is an engineered stone used for a variety of applications in the building and construction industry, be it residential, non residential or Commercial. Quartz can be used either in existing buildings, homes, offices, etc. or in new construction projects instead of tiles or natural stones, to enhance durability, strength as well as minimize maintenance costs for the end users. Quartz stone essentially eliminates most of the innate deficiencies of natural granite stone as well as enables designs that are customized to the end user's choice.

Shyam has been setup with the highest level of quality and systemic controls that ensures consistent production with minimal wastage. Shyam will lead by example and aims to become the feather in the cap for the Indian engineered stone industry.

EXTENDED BEAUTY

The new Collection is inspired from the vision of thinking big. It is available in six different sizes, thickness and textures such as 3200x1600, 3200x800, 3075x1450, 3075x725, 3200x825, which can embellish and adorn living and work spaces all around you. Sophisticated, next-gen technology has been harnessed to create this kind of large size of pieces. This facilitates embellishment of different surfaces leading to seamlessly elegant spaces all around. It is a delight for interior designers and architects to deploy these quartz and create mesmerizing spaces.
