

Royal Engineering Hub

Best Solution For All Engineering Things...

www.royalengineeringhub.in

About Company

The **ROYAL ENGINEERING HUB** is engaged in exercising challenging engineering jobs such as machining, fabrication, engineering precision work and Sheet metal Components. We undertake On-site Fabrication and Erection work also.

ROYAL ENGINEERING HUB was established in 2018 at Ankleshwar as capacity expansion of all type engineering work With perfection and quality in time line.

VISION & MISSION

THE **ROYAL ENGINEERING HUB** VISION

“Make easy and fast service for all engineering work for our valuable client.”

THE **ROYAL ENGINEERING HUB** MISSION

“To be the most CONSISTENT and PREFERRED Supplier. To be the best amongst The best in; product quality, service and customer satisfaction, both internal

And external; and mutual growth.”

QUALITY POLICY

“The **ROYAL ENGINEERING HUB**

Commitment for following Quality point to our client.”

- All time with perfect and complete information.
- Always with meet client requirement.
- Always work with experience team for all large and small work.
- Always prefer client suggest for improvement of work.
- All employees with perfect work schedule and timeline quality work.
- Always best to meet commitment date to client
- Use best of market solution, material and technology.
- Work with error free area.
- Regular train to man and improvement of man skill.
- TUV approved welder and Weld process .

WHY US

We offer superlative quality products at competitive prices to a wide client base. Backed by a well-equipped production unit comprising of modern machines and specialized tools & accessories, which facilitates bulk production capacity, we are able to offer a vast product line. Furthermore, to ensure a hassle free monetary transaction, we offer easy payment modes of cheque, DD & LC. Besides, we deliver our products in India, thereby, catering to a large clientele. Owing to our strong financial position, OEM capability, excellent total quality management & ethical business practices, we have managed to establish a credible name in the market.

OUR COMPETITIVE ADVANTAGES INCLUDE

- Rich experience in our field
- Strong technical expertise and domain knowledge
- Strong market connectivity
- Excellent after sales support and services
- Timely delivery across various countries
- Excellent after sales support

**WE SUPPLY &
WORK IN**

Chemical Industries

Pharmaceutical Industries

Oil And Gas Industries

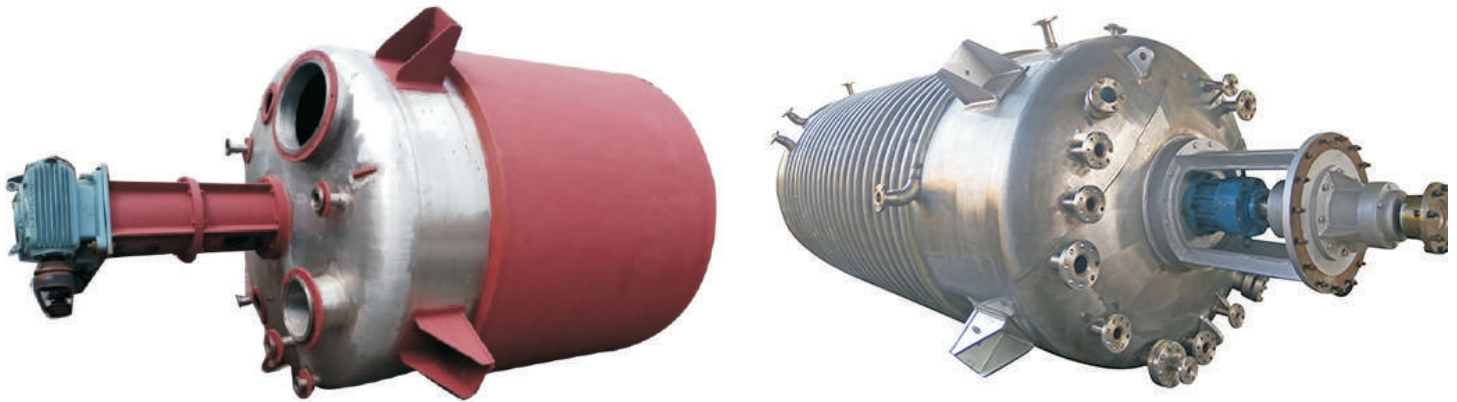

Pigment Industries

Food Industry

REACTOR

OVERVIEW

- REH supplies REACTOR for mixing with high temperature and full seal atmosphere.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make reactor as per client product size and process.
- We provide design as per client site and client URS.

RECEIVER TANK-STORAGE TANK

OVERVIEW

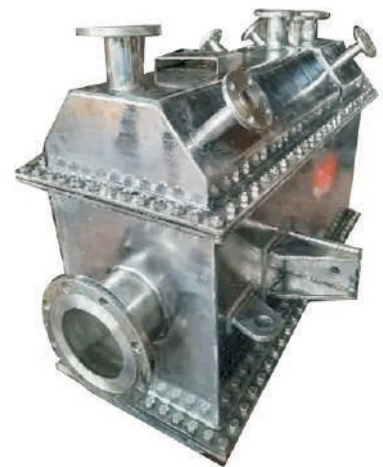

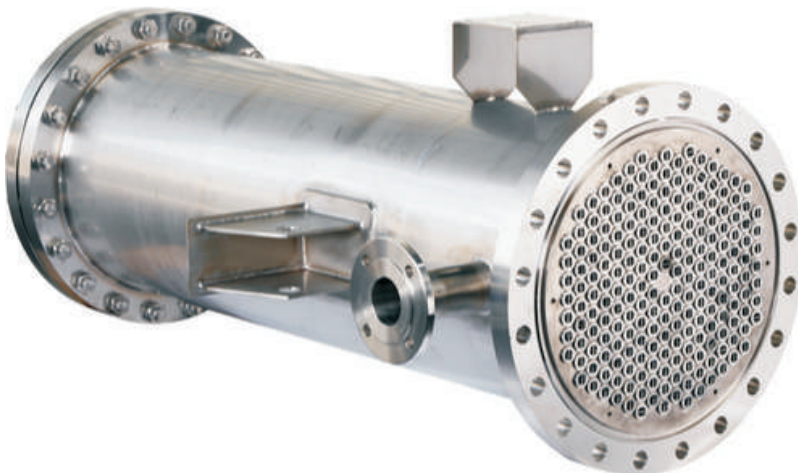

- REH supplies RECEIVER TANK-STORAGE TANK For material storage.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Receiver Tank-Storage Tank as per client product size and process.
- We provide design as per client site and client URS.

OVERVIEW

- REH supplies TD/VTD for drying of high grade, temperature and oxygen sensitive products
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make TD/VTD as per client product size and process.
- We provide design as per client site and client URS.

BOX TYPE HEAT EXCHANGER/CONDENSER

OVERVIEW

As per regular update on technology and engineering need More performance in low space. And box type heat exchange is Best solution for heat transfer in low space with high performance. We can use it in more the one material heat transfer in same time. Higher heat transfer in low space and compact design Easy to assembly and cleaning solution.

OUR PRODUCT

"V" BLANDER

OVERVIEW

- REH supplies "v"-blander for efficient and versatile blending machine for mixing and lubrication process of dry powders.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make V Blander as per client product size and process.
- We provide design as per client site and client URS.

AUTO COATER

OVERVIEW

- REH supplies AC for quick & efficient coating film and sugar coating of tablets, Pills and candies with organic film, aqueous coating and sugar film etc..
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Auto Coater as per client product size and process.
- We provide design as per client site and client URS.

CAGE BLENDER

OVERVIEW

- REH supplies CB for quick & efficient blending.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Cage Blender as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

COATING PAN

OVERVIEW

- REH supplies CP for quick & efficient coating on tablets.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Coating Pan as per client product size and process.
- We provide design as per client site and client URS.

DOUBLE CONE BLENDER

OVERVIEW

- REH supplies DCB for efficient and versatile blending machine for mixing and lubrication process of dry powders.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Double Cone Blender as per client product size and process.
- We provide design as per client site and client URS.

FBD (FLUIDE BED DRYER)

OVERVIEW

- REH supplies FBD for drying, mixing applications in the pharmaceutical industry.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make FBD as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

FBP (FLUIDE BED PROCESSOR)

OVERVIEW

- REH supplies fluid bed processors For drying, mixing and coating applications in the pharmaceutical industry.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make FBP as per client product size and process.
- We provide design as per client site and client URS.

IPC BIN

OVERVIEW

- REH supplies IPC BIN for powder handling & Processing application where containment is required.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make IPC BIN as per client product size and process.
- We provide design as per client site and client URS.

MHD (material Handling Device)

OVERVIEW

- REH supplies MHD for material charging in height.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make MHD as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

OCTAGONAL BLENDER

OVERVIEW

- REH supplies OCTAGONAL BLANDER for efficient and versatile blending machine for mixing and lubrication process of dry powders.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Octagonal Blender as per client product size and process.
- We provide design as per client site and client URS.

MULTIMILL

OVERVIEW

- REH supplies multi-mill can be used as high speed granulating mill, shredder, chopper etc.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make multi-mill as per client product size and process.
- We provide design as per client site and client URS.

VIBRO SIFTER

OVERVIEW

- REH supplies Vibro Sifter can be used as high speed granulating mill, shredder, chopper etc.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Vibro Sifter as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

RCVD (ROTOCONE VACUUM DRYER)

OVERVIEW

- REH supplies RCVD for efficient and versatile blending machine for mixing and lubrication process of dry powders with drying process.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make RCVD as per client product size and process.
- We provide design as per client site and client URS.

RIBBON BLANDER

OVERVIEW

- REH supplies RIBBON BLANDER for efficient and versatile blending machine for mixing and lubrication process of dry powders.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make RIBBON BLANDER as per client product size and process.
- We provide design as per client site and client URS.

RMG (Rapid Mixer Granulator)

OVERVIEW

- REH supplies RMG for mix the ingredients and make granules. .
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make RMG as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

TIPPER

OVERVIEW

- REH supplies Tipper for material transfer from FBD bowl to other device.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make Tipper as per client product size and process.
- We provide design as per client site and client URS.

VERTICAL BLENDER

OVERVIEW

- REH supplies VB for efficient and versatile blending machine for mixing and lubrication process of dry powders in mass product.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make VB as per client product size and process.
- We provide design as per client site and client URS.

VERTICAL SCREW BLENDER

OVERVIEW

- REH supplies VSB for efficient and versatile blending machine for mixing and lubrication process of dry powders in mass product.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make VSB as per client product size and process.
- We provide design as per client site and client URS.

OUR PRODUCT

VTS (Vacuum Transfer System)

OVERVIEW

- REH supplies VTS for material, powder and tablet transfer from each object.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make VTS as per client product size and process.
- We provide design as per client site and client URS.

ANFD (Agitated Nutsche Filter Dryer)

OVERVIEW

- REH supplies ANFD for material filtering, drying and washing in one process.
- We manufacture as per client requirement capacity for R&D and production cGMP model.
- We make ANFD as per client product size and process.
- We provide design as per client site and client URS.

Our Other Service

Machine Repairing

- All machine repairing.
- All machine part repairing.
- Yearly repairing/maintenance contract for all machine

Machine Spare

- All machine spare.

Machine Modification

- All machine modification.
- All machine part modification

Design

- All machine design as per your URS.
- Site lay out as per Your site and space.
- Process design as per material process.
