U-V

HIGH TEMPERATURE CERAMIC PASTE

In two Parts (> 1500 Deg C)

U-V CAC-2 is a two component inorganic water based high temperature resistant (>1500°C)

Applications

- Ideal for bonding, assembling, sealing, joining glass to glass, glass to ceramics, ceramics to metals, ceramics to ceramics, ceramics to quartz and many such bonding applications.
- Excellent thermal conductivity, electrical and mechanical properties, maximum continuous working temperature 1500°C
- Can also be used in electrical application such as bonding, potting, encapsulation of electrical heater elements, metal terminal parts, embedding hot plates, resistor elements etc.
