

COMPANY PROFILE

ACCURATE ENGINEERING :-METAL CUTTING SOLUTIONS

We, ACCURATE ENGINEERING are one of the leading manufacturers and suppliers of Band saw Machines and Band saw Blades in India . In addition to this, we are engaged in offering Maintenance services of Band saw Machines .

About The Company

We, ACCURATE ENGINEERING -started our operation in the year 2003, are among the prominent manufacturers and suppliers of a qualitative array of Band-saw Machines and Blades. The product range comprises Band Saw Machines, Automatic Cutting Machines (Horizontal & Vertical versions) and Semi-Automatic Machines .Their excellent cutting efficiency, less power consumption, sturdy construction, low maintenance cost and longer serving life, make these industrial cutting machines highly demanded in various industries for different cutting purposes. We also offer best quality Re-conditioning services of Metal Cutting Band Saw Machines and Double Column Band Saw Machines. Rendered by experts, these re-conditioning services are known for their execution within the assured time frame. In addition to this, these re-conditioning services are rendered by us at cost effective prices.

Working under the visionary guidance of our Founder Mr.TK PRAKASH who is having more than 30 years in experience in manufacturing of Band saw Machines, our technical team makes sure that the entire products range meets the demands of Mechanical and Engineering Industry. His in-depth knowledge and experience in the industry helps us in meeting the machinery demands of our clients spread nationwide.

Quality Assurance

In order to meet the specific needs of varied industries, we have directed our constant efforts towards maintaining high quality standards in our products. In this regard, we have established strict quality management policies that have enabled us in developing a quality range of Band Saw Machines. We are also backed by a quality control department that is manned by our in-house quality inspectors along with our technical professionals. They rigorously test the entire range, right from the procurement of raw material to the final dispatch of the finished products, so as to ensure its conformation with international quality standards.

We test our range of Band Saw Machines on the following parameters:

- Durability
- High tensile strength
- Reliable performance
- Proper assembling
- Level of vibration and noise

Client Satisfaction

We are a trusted name in the field of Band Saw Machines and strive hard to meet the exact requirements of our clients in the most effective manner. In this regard, we make sure that quality material and latest technology is used during the production process of our machines. To

serve our clients in the best possible manner, we undertake the customization of our range as per their requirements.

Owing to the following significant factors, we have been able to carve a niche for ourselves in this highly competitive industry:-

- Ergonomically designed products
- Provision of perfect marketing and after sales services for the clients
- Availability of annual maintenance

Customization

We understand that to match the exact requirements of our clients; we need to adopt a flexible approach by providing them with the facility of customized products. This further helps us in developing our range in accordance with the specifications laid down by the customers.

We undertake the customization of our range on the following parameters:

- Power
- Frequency
- Speed of machines
- Tools

Our Team

Our asset and strength is a pool of engineers, technocrats, quality controllers, skilled & semi skilled workers and other supporting staff. Utilizing their skills and experience of this domain, we work to attain utmost customer satisfaction. They work in close proximity and coordination with each other, to boast a hassle-free work environment.

In our team, we have following professionals:

- Engineers
- Technocrats
- Quality controllers
- Skilled and semi skilled workers

Our Clientele

We believe in making a long-term relationship with our customers by providing them best quality industrial cutting machines at affordable prices. we have been able to meet the bulk demands of our valuable customers in the most efficient manner. As per the specifications and demands provided by the customers, the offered industrial cutting machines can be customized at our end. We accept different modes of payment, keeping the ease of our customers in mind.

Some of our valuable customers are:

- Bharat Heavy Electricals Limited
- Hindustan Aeronautics Limited
- Sundaram Clayton Limited
- JBM Auto System ltd
- Goel Steel Limited
- Tube Products of India Ltd
- Wheels India Ltd
- Gokul Metals & Engineering P Ltd
- Ramesh Steel Corporation
- United Steel Corporation

Our products

- High Speed Double Column Fully Automatic Band saw Machine
- High Speed Double Column Semi Automatic Band Saw Machine
- High Speed Double Column Special Purpose Band Saw Machine
- Bi Metal Band saw Blades
- Carbide Tipped Band saw Blades
- Vertical Band Saw Machine
- Special Purpose Band saw Machine
- Fully Automatic Band saw Machine with LMG
- Semi Automatic Band saw Machine with LMG

Model available in 260 mm to 2000 mm Cutting Capacity.
