Processing And Milling

Rice In Its Natural Form Is Inedible. Therefore, Milling And Processing Of The Rice Is Required For Attaining The Desired Quality Of Rice. In Our Rice Mills, We Process The Rice For Making It Polished And Edible. The Main Goal Of Milling Is The Removal Of Barns And Hulls From The Rice So That Its Consumption Becomes Possible. Rice Is The Basic Primary Product Obtained From Paddy After Paddy Is Processed. This Rice Is Reprocessed For Obtaining Varied Secondary And Tertiary Products. Here Are Some Of The Operations Done To Create The Final Product.
