Phoenix Air Flow Technologies is an experienced and reputed manufacturer and supplier from Hyderabad that offers a wide range of air handling units, laminar flow bench, HVAC filter, clean room pass box, Ducting system, etc distinguished customers at reasonable prices. Founded in the year 2005, we are offering all types of industrial products to our customers at affordable prices. Due to our top-quality products, we are famous as one of the leading suppliers and wholesalers and retailers. Our products are recognised by our esteemed clients and are demanded among the customers for quality.

Quality Guarantee

We are offering a different range of wooden door panels, filters, ducting systems, airflow sinks, and static pass boxes to our customers. We are providing a greenhouse ventilation system, flooring contractor. We ensure that our products are adequately checked before dispatching the products to the customers. We also ensure that raw materials for our products are procured from genuine manufacturers as per the current industry norms.

Distribution Network

Our services are quick and are serving our clients as per our client's exact air conditioning and ventilation specifications. We have a wide distribution channel throughout the country. Our channel partner also ensures that products are delivered within the agreed time. Our products are distinctly highly praised by our customers. Due to our skilled and trained professionals, we are known for supplying superior quality tools and machinery to our channel partners and customers.
