Warehouse / Godown

A warehouse can be referred to as a building that is used for storing goods. These are used by manufacturers, importers, exporters, wholesalers, transport business, and customs to name a few. Large plain buildings in industrial parks, warehouses are generally found on the outskirts of cities, towns or villages. One can equip them with loading docks for the purpose of loading & unloading of goods from trucks. Locations may vary depending upon the shipping port – railways, airports, seaports. For moving goods from one place to another, cranes and forklifts are used in warehouses. Warehousing can be done for basic material, packaging material, spare parts, components, finished goods, etc. In India, a warehouse may be referred to as a Godown.
